Social impact assessment

Liaison and public consultation

Web-based document and permit management systems

Remote sensing and GIS mapping services

WWW.HATFIELDGROUP.COM

We provide environmental and natural resource consulting services to clients designing, building, and operating infrastructure development projects, including highways, bridges, railways, and oil and gas pipelines. Our personnel have assisted companies in complying with municipal, provincial, and federal regulations and prepared required environmental management plans. We have conducted baseline and monitoring studies to gauge effects on fish, wildlife, benthic invertebrates, and water and sediment quality. In addition, we have carried out environmental impact assessments, environmental monitoring and management activities, remote-sensing and GIS studies, community consultations, and reclamation planning. Our thorough understanding of provincial and federal environmental regulations and our excellent working relationships with agency personnel enable us to provide our clients with cost-effective services.

FEATURED PROJECTS

SEA-TO-SKY HIGHWAY IMPROVEMENT PROJECT

Hatfield was responsible for environmental management, environmental monitoring, quality assurance, securing regulatory permits and approvals, and coordinating the input of environmental consultants for design and construction phases in the project to upgrade the Sea-to-Sky Highway from Horseshoe Bay to Whistler, British Columbia. In 2009, Hatfield was named as a principle consultant on the Sea-to-Sky Highway Improvement project team that received the 2009 Award for Engineering Excellence.

WHISTLER NATURAL GAS PIPELINE PROJECT

Hatfield provided environmental services for the construction of a new natural gas pipeline between Squamish and Whistler, British Columbia. Primary duties included review of the environmental management plan and other environmental documentation, acquisition of required permits and approvals from responsible government authorities, and ongoing project management and monitoring.

NEW FRASER RIVER CROSSING PROJECT (GOLDEN EARS BRIDGE)

Hatfield was responsible for coordinating the project's application for an Environmental Assessment Certificate under the harmonized *British Columbia Environmental Assessment Act* and the *Canadian Environmental Assessment Act*. Hatfield then worked on behalf of the owners during the construction phase to ensure compliance with all issues and conditions associated with the EAC.
